USB Stick Voice Recorder (Item: D1440)

Using the built in Voice Operated System (VOS) the USB Stick Voice Recorder will only record when activated by sound - extending the 18 hours of recording time to days, or even weeks, depending on the amount of voice activity. The 8GB internal memory will hold 288 hours of High Quality (HQ) audio or 144 hours of Extra High Quality (XHQ) recordings. The USB Stick Voice Recorder is perfect for recording lectures or keeping notes or a to-do list!

Features:

Let the USB Stick Digital Voice Recorder do the note-taking for you. The USB stick can record important conversations, lectures, or meetings. Use it to store and recall important information.

Just plug this device into any USB port. It will activate and begin recording once it detects voice conversations nearby. Recording a lecture? It will activate once the teacher begins speaking. Need to record a business conversation? Give an audible signal to the recorder such as 'begin recording and date', and the USB Stick Digital Voice Recorder will begin recording when it recognizes a voice command.

Features:

- Date and Time
- Rechargeable Battery
- Long Recording time
- 8GB internal memory
- Voice Activated
- Two Recording modes

DISCLAIMER: Monitoring software, trackers, and audio surveillance devices are designed to be used only in situations in which you are legally permitted to use them. Check your local state and federal laws to ensure that you are in compliance before using any monitoring products.
