

- 12V 4.5Ah capacity
- SLA technology
- Suitable for hardwired alarm system control panels
- Compatibility with most alarm system control panels
- Long-lasting power
- Reliable performance

The BT-PS12V0045T1 is a good battery that uses 12V and 4.5Ah and is made for hardwired alarm systems. Your alarm system stays powered and functioning at all times thanks to its advanced technology and reliable performance.

This 12V 4.5Ah SLA battery is a versatile and affordable option for alarm system owners. Those looking to replace their existing battery can use it in a wide range of hardwired alarm systems. A reliable and hassle-free replacement option is provided by this battery, which is compatible with most major brands and models.

Safety and security are of utmost importance when it comes to alarm systems, and the BT-PS12V0045T1 delivers on both fronts. This SLA battery is equipped with a sealed lead acid design, ensuring that it is leak-proof and spill-proof. There is no risk of acid spills or leaks that could damage your system or cause harm.

The 12V 4.5Ah capacity of this battery provides ample power to keep your alarm system running for an extended period. This is especially important during power outages or in the case of an emergency because it keeps your system working. You can rest assured that your alarm system will continue to protect your home or business with a longer-lasting battery.

Choose a battery that meets the voltage and capacity requirements for your alarm system when replacing it. The BT-PS12V0045T1 is specifically designed as a 12V 4.5Ah battery, making it a perfect fit for various alarm systems. It's easy to install and replace because of its small size and light weight, making it a great choice for folks who like to do their thing. With its reliable, long-lasting performance, this SLA battery is a cost-effective solution that will keep your alarm system running smoothly for years to come.
