CN-CT-CATDB9-FM Pin Out

Features

- Cost-effective solution for connecting dumb terminals to a central patch panel or MUX
- Modular adapters CN-CT-CATDB9-FM for RJ45 to DB9 male to RJ45 female connections
- Inexpensive silver satin or flat oval twisted pair wire
- Standard way of running client server applications
- Allows connection of dumb terminals to central patch panel or MUX via RS-232
- Provides reliable and efficient data transmission
- Ensures seamless communication between devices
- Cost-effective solution for complex network setups
- Easy installation and setup process
- Versatile compatibility with different devices
- Durable and long-lasting performance
- Ideal for network planners needing to connect dumb terminals on desktop to central patch panel or MUX
- Preferred over other connectivity options due to its affordability and efficiency
- Popular choice for completing connections in client server applications

The CN-CT-CATDB9-FM connector is manufactured using silver satin and flat oval twisted pair wire. This product allows you to connect Passive terminals to a central patch panel or directly to a MUX.

Using modular adapters not only saves time and effort, but it also offers a more efficient way of completing connections. With the rise of client server applications, the need for a reliable and cost-effective solution has become essential. That's where the CN-CT-CATDB9-FM comes in, providing a seamless connection between your devices discounted the cost compared to other alternatives.
