

Features

- Built for video DVR and NVR security camera systems, SkyHawk delivers video-optimized storage that ensures crisp, clear surveillance footage.
- Handle intensive workloads with ease. SkyHawk supports up to 180TB/year, managing 64 HD cameras streaming simultaneously—without dropping a single frame.
- Equipped with built-in RV sensors, SkyHawk maintains peak performance in multi-bay systems, allowing you to scale up flexibly as your storage needs grow.
- Efficient power consumption means lower heat emissions and enhanced reliability. Plus, with SkyHawk Health Management, monitoring drive health is a breeze.
- Enjoy peace of mind with 1 million hours MTBF, backed by a comprehensive three-year warranty and three-year in-house Rescue Data Recovery Services.

Modern surveillance systems can benefit from the Seagate SkyHawk ST3000VX015 3TB surveillance hard drive. This hard drive can handle the changing needs of surveillance environments and capture video footage seamlessly all the time.

You can save high-quality video from up to 64 HD cameras on the SkyHawk ST3000VX015 hard drive. This software is good for systems that keep recording video all the time. This hard drive will easily and reliably capture all your video footage.

In addition to its powerful firmware, the SkyHawk ST3000VX015 also comes with SkyHawk Health Management. This advanced feature is designed to protect your surveillance storage actively by focusing on prevention, intervention, and recovery. This means that the hard drive is constantly monitoring its health and taking measures to prevent data loss. In case of any issues, it also provides recovery options to ensure your data is safe and secure.
