

Features

- Importance of choosing the right gauge speaker wire
- Benefits of using 14 AWG speaker wire for longer cable runs
- 14 AWG dual speaker wire
- Ideal for speaker runs of 25 (18.29m) or less.
- 105-strand count
- Made with 99% oxygen free copper.
- Suitable for both home and commercial audio systems
- Can also be used for alarm systems.
- Ensures clean and professional sound quality.
- Minimizes signal loss and distortion.
- Compatible with various speaker systems
- Suitable for both indoor and outdoor use
- Durable and long-lasting
- Versatile for various audio and alarm system needs

Introducing the CB-A1425, the perfect solution for all your speaker wire needs! This 14 AWG dual speaker wire is designed specifically for use with speaker runs that are 25 (18.29 m) or less, making it the ideal choice for various audio setups. Whether you're setting up a home theater system, commercial audio speakers, or even an alarm system, the CB-A1425 is the ultimate cable for achieving crisp, clear sound quality.

When it comes to installing speakers, choosing the right gauge wire is crucial. The CB-A1425 takes the guesswork out of the equation by offering the perfect gauge for longer than normal cable runs. With a 105-strand count and 99% oxygen free copper construction, this speaker wire ensures maximum conductivity, resulting in a powerful and professional sound performance.
