The Telpix HO-605 is a high-quality outdoor camera housing designed to protect your surveillance camera from harsh weather conditions. Your camera is well-protected at all times thanks to the durable aluminum material used in this housing.

The Telpix HO-605 is compact and spacious enough to accommodate various camera models. Its sleek beige color makes it a good choice for both residential and commercial properties.

One of the standout features of the Telpix HO-605 is its sun shield. This part prevents the sun from shining on the camera lens, which can make your video look bad. The sun shield helps protect the camera from UV damage and ensure that it will continue to function at its best.

For added security, the Telpix HO-605 comes with a lockable clasp. This means that you can safely secure your camera inside the housing, preventing any unauthorized access or tampering. Whether you are using the housing for a home security system or for monitoring a business, the lockable clasp provides peace of mind and ensures that your camera remains securely in place.
