Are you in need of a high-speed HDMI cable that has the capacity for Ethernet connection and is also slim and unobtrusive? Look no further than the CB-TNC106PBB 30AWG or 28AWG from Truon. This flat cable is the perfect complement to any modern home entertainment setup.

The CB-TNC106PBB is the perfect combination of performance and sleekness. The cable is just 3.5 mm thick, making it easy to work with in tight spaces and unobtrusive when you're running it along baseboards or under carpets. This cable also reduces the interference from other devices, ensuring reliable performance and quality entertainment.

One of the most amazing features of the CB-TNC106PBB is its capacity for Ethernet connection. This feature allows IP enabled home entertainment devices to access streaming HD content with a single cable. This means that you no longer need to worry about connecting multiple cables to get the same reliable connection.

In addition to its Ethernet capabilities, the CB-TNC106PBB also features an embossed aluminum shell, which provides both shielding from interference and a durable connection. It is also fully compliant with the latest versions of HDMI 1.4. Discounted the cost of other HDMI cables, you can get the same performance and quality without compromising on your budget. So why settle for anything else?
