

CN-KD-CB26 Modular distributor is a device designed to allow two RJ45 ports

- **Easy Install:** The CN-KD-CB26 Modular Distributor requires no special tools or technical know-how to set up.
- **Flexible Layout:** It allows for different configurations, such as one-to-one, one-to-many, and many-to-many.
- **Increased Efficiency:** With the CN-KD-CB26 Modular Distributor, you can share one shielded Cat5 network cable between two RJ45 ports, allowing for increased efficiency and productivity.
- **Cost Savings:** By utilizing the CN-KD-CB26 Modular Distributor, you can save on cost by eliminating the need to purchase additional cables.
- The CN-KD-CB26 Modular Distributor is an efficient, cost-saving solution for sharing one shielded Cat5 network cable by two RJ45 ports. It's easy to install and flexible in its layout, helping you save on time and money.

The CN-KD-CB26 Modular distributor is a device designed to allow two RJ45 ports to share a single Cat5 shielded network cable in a pair of configuration. This device is perfect for any network designer looking to implement a cost-effective and secure solution for sharing a single cable for multiple network connections.

The main advantage of the CN-KD-CB26 Modular distributor is its versatility. It allows two different RJ45 ports to be connected to a single Cat5 shielded cable, allowing them to both access the same network. This makes installation easy and cost-effective for any network designer. The ability to share a single Cat5 shielded cable also means that the network is more secure, as there will only be one point of access for the two devices.

The CN-KD-CB26 Modular distributor also offers an impressive level of performance. This device is capable of supporting up to 10/100/1000 Mbps Ethernet speeds, ensuring that any network connection is fast and reliable. It is also backwards compatible with older network hardware, allowing it to be used with legacy equipment. This means that the CN-KD-CB26 Modular distributor can be used for both new and old networks, making it an ideal solution for any network designer.

The CN-KD-CB26 Modular distributor also offers an impressive level of durability. It is built with high-grade components and is designed to withstand the rigors of a busy network environment. This means that the device can provide reliable performance for years to come, without the need for frequent maintenance or replacement.
