

- RF/coaxial Tee Adapter
- BNC Female to Female connection
- BNC Male jack connection
- Nickel-plated brass body
- Silver-plated beryllium copper contact
- PTFE insulator
- 50 Ω Impedance

The Telpix CN-SB021 RF/coaxial Tee Adapter is an essential tool for any audio or video setup. This adapter is easy to connect and route signals between multiple gadgets. For seamless signal transmission, the Telpix CN-SB021 is a must-have.

Crafted with high-quality materials, the Telpix CN-SB021 guarantees reliable and durable performance. Its nickel-plated brass body provides excellent corrosion resistance, ensuring that the adapter will last for years to come.

The silver-plated beryllium copper contact offers superior conductivity for clear and uninterrupted signal transmission. This adapter can withstand high temperatures and provide great insulation for your audio and video signals.

Its 50 Ω impedance makes it suitable for various applications, while its compact design ensures easy use and portability. Upgrade your audio and video setup with the Telpix CN-SB021 and experience seamless signal transmission like never before.
