

- High-performance data cable
- Suitable for high bandwidth voice and data installations
- 24 AWG solid bare copper conductors
- Cable Diameter (CMR): 0.20" Sequential footage markings for usage tracking
- 4 Unshielded Twisted Pair (UTP) Cable
- Solid 4 Pair 99% Copper
- UL Listed
- Performance up to 350Mhz

This cable, CB-C5E-E, has been constructed with a durable PVC casing and is flame retardant for enhanced safety. The 99% copper-clad 24AWG wires enclose and protect four unshielded solid-twisted pairs, ensuring reliable data transmission without any interference. This cable supports both PoE and PoE+ with power and voltage capabilities of up to 30W and 300V DC.

Additionally, the Cat5e PVC network cable follows industry standards like IEEE 802.3AB, IEEE 802.5, ANSI/EIA/TIA 568, and ISO/IEC 11801. This makes it compatible with many devices and networks. Solid core conduits provide better performance over longer cable runs, making this cable suitable for custom network installation projects. The CB-C5E-E Ethernet bulk cabling is the best choice for all of your networking needs.

At Collsam Distribution, we try to give our customers reliable and good networking solutions. This cable is called the CB-C5E-E Cat5e Ethernet cable. Our cables are made to last and perform well, making them a good choice for all your networking needs. Why settle for subpar network connectivity when Collsam Distribution offers the CB-C5E-E UL Listed Ethernet cable? Upgrade your network today and experience the difference in speed, reliability, and overall performance.
