

It's what's inside that counts

Top quality 24 AWG CM rated Cat 6 with stranded bare copper conductors, made for better conductivity and stronger signal.

- U/V Resistant and waterproof HDPE insulated jacket
- Thick polyethylene (PE) protective jacket for indoor/outdoor use
- 1000 ft (304.8 m) of uncapped, aluminum foil Shielded Twisted Ethernet cable (F/UTP)
- Copper clad Aluminum/Copper Clad alloy (CCA) construction
- Packaging: wooden spool in brown box packaging

The Paige® CB-C6E-710648DB is the ultimate choice for a reliable and high-performing outdoor CAT6 cable. This premium cable is designed to meet all your networking needs, whether it's for indoor or outdoor use. With its UV rating, this cable can withstand harsh outdoor conditions, making it the perfect choice for setting up a local area network system in your home or office.

What sets the Paige® CB-C6E-710648DB apart from other CAT6 cables is its 99% solid copper construction. This ensures superior performance and a stable internet connection, with minimal signal loss or interference. By using solid copper, this cable can support higher bandwidth and faster transfer speeds, making it ideal for heavy internet usage and demanding applications.

In addition to its solid copper construction, the Paige® CB-C6E-710648DB also features a 4-pair, 23 AWG design. This means that the cable has four twisted pairs of wires, each with a 23 gauge thickness, tightly twisted together to minimize crosstalk and interference. This results in a cleaner and more reliable signal, allowing for faster data transmission and better overall performance.
