

## SPECIFICATIONS

Material	Aluminum
Dimension	Φ 4.8031 inches (12.2 cm) × 1.36 inch (3.45 cm)
Inch Thread	M20(G1/2")
Operating Temperature	-40 °F (-40 °C) ~ 140 °F (60 °C)
Humidity	0 ~ 90% RH
Load Bearing	2.20 lb (1 kg)
Weight	0.53 lb (0.24 kg)
Color	White

This is where Eyemax CJB-E137, a security camera junction box, comes in. The CJB-E137 security camera junction box is where your camera's cable connections will reside. This provides protection for your camera's cables from not only the elements, but potential vandalism as well. Continue reading to learn what the advantages are of using security camera junction boxes.

Most people opt for cameras with an IP67 rating when erecting security cameras outdoors. This ensures that the camera can stand up to rain and temperature fluctuations. Although this safeguards the camera's physical durability, it fails to safeguard its cable connections.

Prevent corrosion and electrical shorts with CJB-E137, while our cameras come with a water-resistant connector. This does not mean they are waterproof. Moisture can still creep in and corrode the Ethernet or coaxial connection and ultimately short out your camera.
