

## Features

- Built for video DVR and NVR security camera systems, SkyHawk delivers video-optimized storage that ensures crisp, clear surveillance footage.
- Handle intensive workloads with ease. SkyHawk supports up to 180TB/year, managing 64 HD cameras streaming simultaneously—without dropping a single frame.
- Equipped with built-in RV sensors, SkyHawk maintains peak performance in multi-bay systems, allowing you to scale up flexibly as your storage needs grow.
- Efficient power consumption means lower heat emissions and enhanced reliability. Plus, with SkyHawk Health Management, monitoring drive health is a breeze.
- Enjoy peace of mind with 1 million hours MTBF, backed by a comprehensive three-year warranty and three-year in-house Rescue Data Recovery Services.

The Seagate SkyHawk ST2000VX017 2 TB surveillance hard drive is the perfect solution for modern surveillance systems. New features and technology meet the changing needs of the surveillance industry.

One of the key features of the SkyHawk ST2000VX017 is its ImagePerfect™ firmware. This firmware ensures seamless video footage capture in 24/7 recording environments. It can handle intense workloads and record video from up to 64 HD cameras with ease and reliability. With this hard drive, your surveillance system will always be working and taking good pictures without any problems.

The SkyHawk Health Management feature is another standout aspect of this hard drive. It actively helps protect your surveillance storage by focusing on prevention, intervention, and recovery options. It continuously monitors the health of the hard drive and takes necessary actions to prevent any potential failures. In case of any issues, it also offers recovery options, ensuring that your important data is always safe and secure.
