

The Seagate SkyHawk ST4000VX016 is a high-performance 4 TB hard drive specifically designed for use in DVR and NVR systems. With its large storage capacity and robust features, this hard drive provides reliable and efficient video storage for 24×7 workloads and up to 64 HD cameras.

Powered by a SATA 6Gb/s interface and a 256 MB buffer, the ST4000VX016 boasts fast data transfer speeds and efficient data caching, ensuring smooth and uninterrupted video recording. Whether it's for home or business surveillance, this hard drive can handle large amounts of high-definition footage with ease.

Features

- Built for video DVR and NVR security camera systems, SkyHawk delivers video-optimized storage that ensures crisp, clear surveillance footage.
- Handle intensive workloads with ease. SkyHawk supports up to 180TB/year, managing 64 HD cameras streaming simultaneously—without dropping a single frame.
- Equipped with built-in RV sensors, SkyHawk maintains peak performance in multi-bay systems, allowing you to scale up flexibly as your storage needs grow. Efficient power consumption means lower heat emissions and enhanced reliability. Plus, with SkyHawk Health Management, monitoring drive health is a breeze.
- Enjoy peace of mind with 1 million hours MTBF, backed by a comprehensive three-year warranty and three-year in-house Rescue Data Recovery Services.
