

- Stainless-steel construction
- Brushed finish.
- Wide faceplate for easy installation
- Description of the push button
- Use in access control and door lock systems.
- Benefits of the mushroom shape

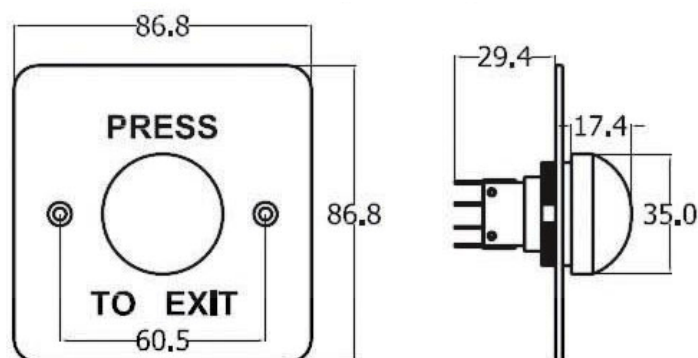

Introducing the DA-BR-PB06, the perfect solution for your access control and door locking needs. This stainless-steel exit button features a sleek brushed finish and a wide faceplate, making it not only functional but also aesthetically pleasing. Designed with security in mind, the DA-BR-PB06 is a must-have for any building or facility.

The DA-BR-PB06's mushroom push button is specifically designed for easy access and operation. Simply press the button and the door will unlock, allowing you to exit the room or building. This makes it an ideal choice for high-traffic areas, such as office buildings, schools, hospitals, and more.

But the benefits of the DA-BR-PB06 don't stop there. This exit button also serves as both a "push to exit" and "request to exit" button. This means that not only can you easily exit the room, but you can also alert personnel that you are trying to leave. This added security feature is essential for emergencies or when it's necessary to monitor who is exiting the building.

Constructed from high-quality stainless steel, the DA-BR-PB06 is built to withstand daily use and is resistant to wear and tear. The brushed finish not only adds a touch of elegance, but it also helps to prevent scratches and smudges, ensuring that this exit button will maintain its appearance over time.
