

DA-FOH01RF Verification: The latest product from ViRDI designed for fingerprint and RF contact less and contact card verifications.

- Purpose Access Control and Time and attendance.
- Flexibility: Supports various biometric, RF contact, and contactless card authentication.
- Security: Delivers enhanced security to prevent unauthorized access.
- Manufactured with the highest-grade materials to guarantee reliability.
- Convenience: Get access quickly and securely with a single device.
- Improve performance by streamlining authentication procedures.
- Enjoy the advantages of a single-access system without additional costs.

The ViRDI DA-FOH01RF is a new product that combines different ways of identifying and verifying things. This access control and time and attendance system is a unique product that combines fingerprint verification, contact cards, and RF contactless cards. The purpose of this product is to ensure maximum security and accuracy when utilizing credentials and labor tracking in a protected environment.

The fingerprint reader can quickly and accurately check and save fingerprints. ViRDI DA-FOH01RF has a feature that checks fingerprints right away and makes sure everyone is authentic. It does this quickly and accurately. The contact cards are also compatible with the ViRDI DA-FOH01RF, allowing users to use their contact cards to quickly access the system and register their attendance.

In addition, the ViRDI DA-FOH01RF is also compatible with RF contactless cards. These cards are tamper-proof and durable, making them ideal for high security areas. The contactless technology allows for quick and easy access to the system without having to get in contact with a card reader. Furthermore, the cards provide enhanced security by ensuring that only authorized users can access data.
