

- DC 2.5 (internal) x 5.5 (external) mm
- female Terminal Block 2 pin
- Positive pole inside, negative pole outside
- 5.0 mm pitch

DC power TR-PIGTAIL-TB 10 Pack pigtail is used to connect your security cameras to your power distribution system or power adapter. It features a male coaxial power plug on one end to two bare wires on the other. 6 inch (15.24 cm) connector for CCTV camera power.

You may want all your cameras to be powered from the location your DVR is sited. For example, a shop premises may require all cables to lead to a secure back office where they cannot easily be disconnected. The easiest solution would be to use a RG59+2 composite power and video cable, also known as a shotgun cable. This is two small cables fused, one carries the video signal and the other carries the power. This type of cable saves time and money and can be easily installed for any application.

- DC 2.5 (internal) x 5.5 (external) mm female
- Terminal Block 2 pin
- Positive pole inside, negative pole outside
- 5.0 mm pitch
