

The RA-TR-24A1620N is a top-of-the-line power supply with the latest UPS (Uninterruptible Power Supply) system. This product is perfect for protecting workstations, network equipment, and home entertainment systems in the event of a power outage. This power supply ensures that your gadgets will safely shut down without any harm or data loss. Remember that you need to bring your batteries for maximum safety.

Home or work can use this power source because it's compatible with most electrical systems. When you turn on the power, green LED lights will come on. One can readily observe the utilization of the power supply, thereby ensuring the security of their belongings.

- Design with UPS (Uninterruptible Power Supply) system
- Protects workstations, network, and home entertainment equipment
- Allows proper shut down of equipment during power outage
- Batteries not included in power supply
- AC 100-240V input
- Green LEDs light up when power switch is set to "ON"
- DC 12V output
- Supply current 20Amp
- Ports output current: 2A
- DC12V regulator
- 16 outputs with PTC reset fuse
- Independent PTC fuse and LED indicator for each output
- Lightning protection
- Only affected output is affected during a problem, other outputs still working
