

B-Tron TR-C12VDC18P10A DC 12V 18CH 10A Non-Fused Breaker

Features

- 12VDC and 18AMP Current 10AMP output
- Solid-state relay Compact and durable design
- High-power switching capability
- Fast response time
- Low-power consumption
- LED indicator for status monitoring
- Increased efficiency and reliability
- Cost-effective solution
- Easy installation and operation
- Space-saving design
- Low maintenance requirements
- Complies with CE, RoHS, and UL safety standards.

B-Tron TR-C12VDC18P10A power supply box, also known as a power distribution box, allows surveillance system installers to easily manage the power to multiple CCTV cameras at a central point (usually at the location of the DVR). This allows your camera installation to be neater. For example, instead of connecting 9 transformers to a power strip or electric surge protector, you can connect all the camera's power wires to a box with 9 ports.

The power supply boxes typically reside close to your video recorder. B-Tron TR-C12VDC18P10A box is simple to install. Each camera's power cable simply screws into the power distribution block inside the box. B-Tron TR-C12VDC18P10A power supply box plugs into a standard power outlet. You don't need an electrician to do the installation. All of our boxes now use PTC auto-reset fuses.
