

Functions

- Eighteen (18) PTC protected outputs.
- Output fuses are rated @ 500 mA.
- 115VAC 50/60Hz, 1.45 amp input.
- Input fuse is rated @ 3.5 amp.
- AC or DC power LED Indicator.
- Unit maintains camera synchronization.

Dimensions: 12 inch (30.48 cm) H × 12 inch (30.48 cm) W × 4 inch (10.16 cm) D.
1/2" and 3/4" combination knockouts.

- 24VAC power for CCTV cameras, heaters, and other video accessories.

Introducing the B-Tron TR-C24VAC18P05A AC 24V 18Channel 5AMP Non-Fused Breaker Power Distributors, also known as a power distribution box. Security systems have been specifically developed for this particular device. It helps installers control power to many CCTV cameras from one place. With this power distribution box, you can install your camera in a neat and organized way.

With the B-Tron TR-C24VAC18P05A power supply box, you can convert AC power into DC power. An input power transformer reduces the voltage to the level needed by the load. This process makes sure the cameras get the right voltage and keeps the power supply from the mains for safety.
