- EX-SDI output
- Switch on HD-SDI Output

The Eyemax UIR-1412V is a great safety tool that's great for taking pictures outdoors. With a 1/2.7" 2-megapixel sensor, this camera captures clear, detailed footage in 1080p resolution.

The Eyemax UIR-1412V helps protect against rain, snow, and dust. It is designed to provide protection against precipitation, snowfall, and dust. This makes it an ideal choice for outdoor use in locations such as parking lots, construction sites, and entrances. This camera provides clear and detailed footage even in low-light conditions, ensuring that your property is always under surveillance.

One of the standout features of the Eyemax UIR-1412V EX-SDI Outdoor Bullet is its EX-SDI capability. This advanced technology allows for real-time transmission of 4K resolution footage at a high frame rate over a coaxial cable. This means you can have exceptional video surveillance without spending a lot of money on expensive equipment. It's a viable option for both homes and businesses.

The Eyemax UIR-1412V has many advanced features to improve security. With a 3DDNR function, the camera reduces digital noise and enables clear footage even in low-light environments. The defog feature helps improve visibility in foggy or hazy conditions, ensuring that your footage is clear and usable.
