

# SIM Card Seizure (SCS)

SIM Card Seizure is an advanced SIM card reader and software program combined which quickly and effectively retrieves text messages purposely or accidentally deleted from SIM cards that would otherwise never be found presenting the information in an easy to read format. In addition to SMS message retrieval the device serves many other very useful functions including SIM card data backup, print out of SIM card information, and allows compile a detailed report of your findings. You can also view the last 10 dialed number. SIM Card Seizure is also an MicroSD card reader so you can use the device to upload data to your pc for viewing data such as videos and pictures often stored on MicroSD

data storage cards found on many phones. SIM Card Seizure has been a trusted tool for law enforcement for computer forensics since 2005 so you know you are getting the most deleted data possible from your SIM card.

## Paraben's SIM Card Seizure - SIM Card Data Recovery System features:

- Easy to install and use - no technical skill required
- Reads any SIM card in any country on any network including new CDMA SIM cards
- Retrieve all deleted data within minutes
- Reads last dialed numbers
- Shows all SIM card information
- Read, restore and undelete SMS messages
- Read and restore phone book
- Create a comprehensive report of all recovered data
- Includes SIM reader, micro and nano adapters

Please Note: Paraben's SIM Card Seizure is able to recover deleted SMS data stored on GSM or CDMA SIM cards. However, some cell/mobile phones store SMS on the actual device rather than the SIM card. If SMS messages are not stored on the SIM, deleted data recovery will not be possible using SIM Card Seizure. As with any deleted data, recovery depends on whether or not the information has been overwritten with new information. Some SIM cards may also be locked with a PIN. It is not possible to access data on locked SIM cards without knowing the pin. There is no guarantee your SIM will have data to recover. Please consider these factors before using SIM Card Seizure.

## Requirements

Runs on Windows XP, Vista, 7, 8, 10  
1.33 GHz processor or higher  
1 GB memory  
200 MB hard drive space
