

# IBA-MS byeball DELUXE Metal Base Mount for Fixed Lens Models

IBA-MS Junction boxes are the easiest way to get extra leverage for your camera.

Just place this IBA-MS 1-1/2 inch deep base under an eve of a home to allow for a dome camera to get its IR's over the lip of the eve. You can even mount IBA-MS these directly in the elements, these rugged metal junction boxes are meant to last.

Mount IBA-MS directly to an exterior warehouse wall to give your camera the ability to see down the side of buildings cleanly.

What's even more exciting is you can wrap up the camera tail whip in the box, keeping it secured from the elements and making it easy to service in the future.

- universal camera junction box mount is designed for the outdoor/ indoor bullet IP /dome surveillance camera cables, easy to install.
- This provides a compact and neat solution for cable management during installation.
- Allowing you to store the unused cables in a metal box, not only provide you a neat arrangement, but also protect your cables from severe weathers.
